

In order to support the Media Team department, Airbus Helicopters is offering an

Internship for Technical Communication (d/f/m) for Helicopter Training Media

(Reference: JR10403418)

Are you an enthusiastic student at the beginning of your professional journey, eager to get hands-on with cutting-edge aerospace projects in a dynamic media environment? Airbus Helicopters is looking for a proactive intern (d/f/m) to join our Media Team and bring our stunning aircraft to life.

Location: Donauwörth

Start: As soon as possible

Duration: 6 months

Your location

At our Donauwörth site, located on the banks of the river Danube, we develop helicopters from the initial idea to the airworthy product. Watch them take off and touch down on our own on-site test airfield.

Your benefits

- Attractive salary and work-life balance with a 35-hour week (flexitime).
- International environment with the opportunity to network globally.
- Work with modern/diversified technologies.
- At Airbus, we see you as a valuable team member and you are not hired to brew coffee, instead you are in close contact with the interfaces and are part of our weekly team meetings.
- Opportunity to participate in the Generation Airbus Community to expand your own network.

Your tasks and responsibilities

- You'll design and develop high-impact training materials and multimedia tools that empower the next generation of pilots and technicians.
- You'll help create clear, expressive texts and graphics that make complex machines easy to understand.
- You'll be researching and gathering all the facts needed to build top-notch documentation.
- We don't just want a pair of hands; we want your brain. You'll brainstorm new ways of doing things and help the team improve how we work.

Desired skills and qualifications

- Enrolled full-time student (m/f/d), preferably in the field of Technical Communication, Media Studies or Information Design, or a comparable subject area
- Attraction to and interest in aerospace industry
- Ideally, initial experience in handling Content Management Systems, Editorial Systems, Single-Source Publishing, or similar software
- Knowledge in the linguistic and visual presentation of complex technical products or the ability to acquire such knowledge
- Commitment, initiative, and teamwork skills, as well as a structured, independent way of working
- Knowledge of MS-Office or Google Workspace products
- Very good English skills, both written and spoken
- If possible, additional knowledge in working with raster graphics or vector graphics
- If possible, additional knowledge in working with 3D CAD data

Not a 100% match? No worries! Airbus supports your personal growth.
